VESSEL Air Nipper / Blade System

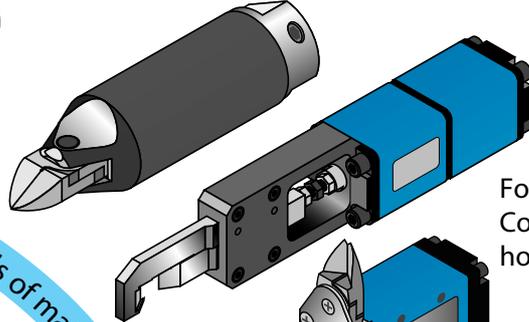

Cutting, Crimping, Grasping, Breaking, Bending, Punching, Extending and Heat Cutting

VESSEL Air Nipper also can do other works. There are many other applications being not aware of. VESSEL can provide main body models, high-quality blades, optional blades, (even 1pc. can be manufactured) and other products to you. You can surely find out the main body model, blade or proper combination which are just fit to all works.

For machine mounting
 / With screw holes on 5 surfaces
 Square air nipper
 (NS series)

Possible to adjust fine turn angle
 / Convenient for mounting of holder. Etc.
 Air nipper round-type without lever (NR series)

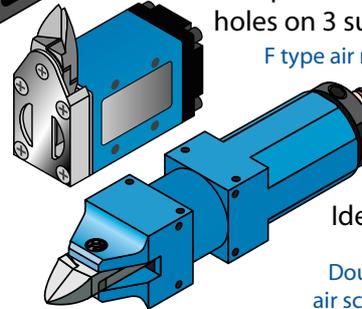

Thrust-cut type /
 Optimum for film gate cutting

Thrust-cut air nipper (NK10)

For mounting of machine jig/
 Compact body & with screw holes on 3 surfaces

F type air nipper (NF series)

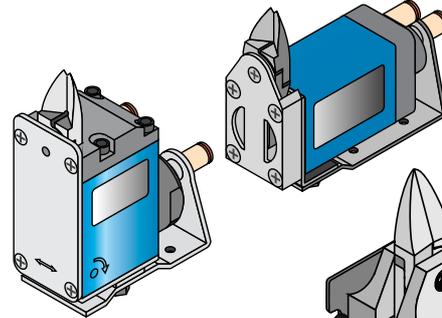

Ideal for consecutive working

Double action air nipper /
 air scissors (NW/HW series)

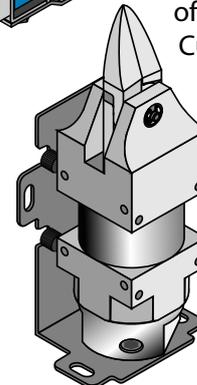

Horizontal type with slide-off mechanism / Cutting closer to work

Slide-off air nipper horizontal-type (NY series)

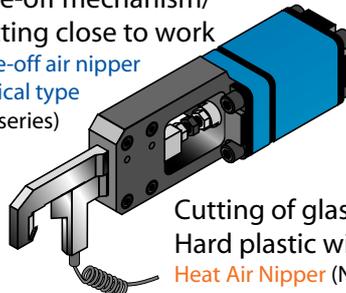

With slide-off mechanism /
 Cutting close to work for big materials

Slide-off air nipper
 bracket-type
 (NB series)

Vertical Type with
 slide-off mechanism/
 Cutting close to work

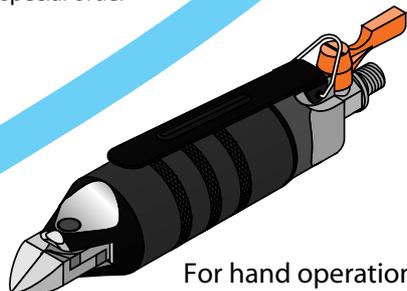

Slide-off air nipper
 vertical type
 (NT series)

Cutting of glass fiber plastic/
 Hard plastic without whitening and crack

Heat Air Nipper (NTH /NKH series)

accept 1pc.
 special order

For hand operation
 Air nipper (N series)

Peripheral Unit

- Gate cutting (at a time) for many quantity molded products.
 Gate cut table (ACT-30)
- For adjusting the timing of slide and cut
 Timing controller (TC-02)
- Increase of applying pressure by mounting to N / NS / NR
 Intensifier (P series)
